Cracked ZapWallPaper Magick With Keygen - is a lightweight software application built specifically for helping you change your wallpaper at user-defined time. This unobtrusive tool runs quietly in the system tray until called upon when it reveals several configuration settings. The program gives you the possibility to automatically change the wallpaper at a certain time and modify the background at Windows startup. Plus, you can select the target location, which contains the images that you want to be set as your wallpaper, include subdirectories, and make the utility change the photos in a random order. What's more, you are allowed to stretch the pictures, apply black and white, oil painting, gamma, or negative effects, as well as add to the current wallpaper a user-defined image and/or special effects, such as black and white, sepia, monochrome, border glass, or others. The utility lets you insert additional frames, themes, and scrapbooks. Plus, you can change the wallpaper by performing a double-click operation on the program's icon from the system tray. Last but not least, you can make the tool run at Windows startup, generate a slideshow, as well as go to the previous or next wallpaper. During our testing we have noticed that ZapWallPaper Magick carries out a task quickly, provides very good image quality, and no errors showed up throughout the entire process. It leaves a minimal footprint on system resources, so the overall performance of the computer is not affected. All things considered, ZapWallPaper Magick seems to be the right choice in case you are looking for a simple-to-use desktop enhancement application.
